PORCELAIN TILES FOR OUTDOOR LIVING

Outdoor Tiles

Porcelain tiles have revolutionised how we can finish terraces and patios offering a host of design possibilities while also providing functional benefits that ensure your outdoor area is easy to maintain and will look wonderful for years to come.

Indoor / Outdoor Design

Indoor and outdoor tiles from the same range will allow for an attractive continuity between the two spaces, seamlessly extending your living space to the outdoors. Many ranges have an R9 or R10 slip rated version for use indoors which can be paired with a matching outdoor tile with R11 anti-slip finish.

Good to Know!

BAL supply professional quality leveling compounds, adhesive and grout and also provide expertise and the technical solutions for fitting outdoor tiles. Ask our experienced team for more details.

Anti-Slip

'R' value indicates the level of slip resistance of a tile and for outdoor use a R11 slip rating is required.

Tiles with an R11 Slip Stop rating are suitable for both indoor and outdoor use as they have a smooth finish that is slip resistant but yet easy to clean and maintain.

Tile Thickness

20mm extra thick tiles are designed exclusively for outdoor use while tiles with a standard 10mm thickness can also be used outdoors if they have an anti-slip rating of R11 and are fixed with suitable adhesive.

WHY CHOOSE TILES FOR YOUR OUTDOOR SPACE

Outdoor tiles offer a wide variety of styles and colours which will suit any outdoor space. In addition to looking wonderful porcelain makes a great practical solution for your outdoor space and will look wonderful for years to come.

- » Matching indoor & outdoor tiles for a seamless look
- » R11 anti-slip rated
- » Frost resistant & waterproof
- » Resists moss growth
- » Easy to clean & maintain
- » Resists stains & scratches
- » Colour will not fade or become dull over time

Tubs & Tiles can offer you a huge selection of outdoor tiles which are available to order with a short lead time from our leading suppliers in Spain & Italy. So if you have a colour scheme, vision or a style that you imagine for your outdoor space we can provide you with quality tile options from our trusted tile partners. These ranges are just a taste of the myriad of possibilities.

SPECIAL ORDER - LEAD TIME

SPECIAL ORDER - LEAD TIME

Indoor - outdoor design can be visually seamless thanks to the many ranges which provide tiles for kitchen and living areas with a matching outdoor solution. The outdoor version have R11 slip resistance for safety but look identical to your indoor tile so you can extend your living space to the outdoors! Porcelain is strong and durable while resisting staining and moss growth so is perfectly suited to the Irish climate.

FITTING INFORMATION FOR EXTERIOR TILES

ADHESIVE INSTALLATION

Adhesive Installation is the ideal laying solution for outdoor tiles and the surface is extremely resistant to both dynamic and concentrated loads.

BAL offers a straightforward system for external tile fixing with the re-assurance of the trusted market leading BAL name.

BAL's external tile installation range has been carefully formulated to provide ease of use when installing external porcelain tiles. BAL products are freeze/thaw resistant, and use the most up-to-date technology to ensure long-lasting patios and terraces.

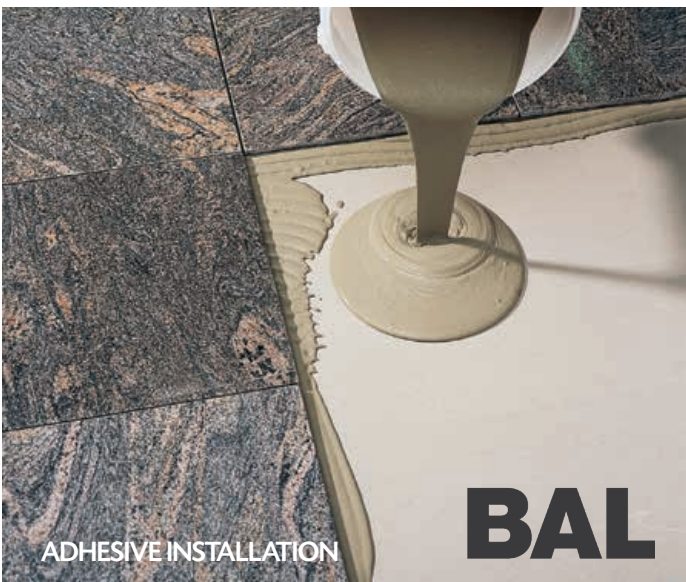

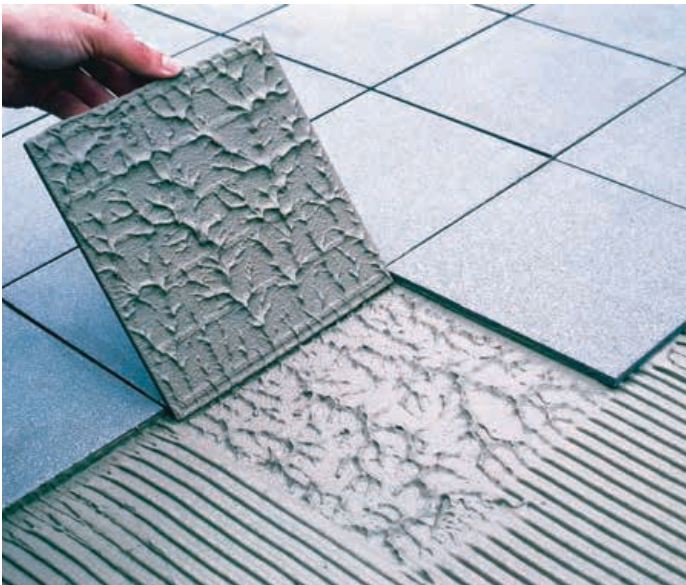

Surface Preparation

The surface which you are tiling must be cured, stable and level.

Curing - Concrete must be mature and fully cured which will be typically 6-8 weeks after installation in good drying conditions. Bonded sand cement screeds typically 4-6 weeks to cure.

BAL Level Out BAL Level Out. Fast-setting external levelling compound is the recommended choice for smoothing rough or impact damaged concrete before fitting tiles. Gradients and falls must be installed to avoid water pooling on the surface of the tiles.

BAL External Bedding Mortar is a pre-blended mix of cement and graded fillers to provide a semi-dry mortar bed.

Bal External Priming Slurry Bond is a flexible priming slurry for bonding external tiles. This is recommended to improve the bond between the adhesive and the substrate.

BAL XL Floor One Adhesive is a flexible large format floor tile adhesive for internal and external areas.

BAL Micromax Grout provides the perfect finish. This high performance grout has longer-lasting and improved Microban® antimicrobial protection as well as an efflorescence-free formulation and locked-in colour consistency, Micromax3 ECO provides the ultimate long-lasting finish for your tiling project.

RAISED PEDESTAL SYSTEM

Terra Maxx Pedestal System

The pre-assembled pedestals enable quick and easy laying of tiles on exterior surfaces. Water runs between the tile joints and gullies can be hidden in the cavity between the tile covering and the substrate. The tiles can be lifted and the surface underneath can remain accessible.

- Height adjustable without tools by 9% to create fall
- High pressure load up to 600kg
- Pre-manufactured and ready for immediate use
