

SPARE PARTS

Ref. Description

Spare No.

| | | |
|---|---|----------|
| - | Kit white without rail | 88900052 |
| - | Kit chrome without rail..... | 88900053 |
| A | Brackets & trims white | 22013460 |
| | chrome..... | 22013470 |
| B | Bracket Trim white..... | 22013480 |
| | chrome..... | 22013490 |
| C | Riser rail Ø20,6mm X 530mm chrome..... | 88800031 |
| D | Riser rail end trims chrome..... | 22011860 |
| E | Shower head holder Ø20,6mm white..... | 22013500 |
| | chrome..... | 22013510 |
| F | Hose retainer clear | 22013450 |

Flexible hoses available in the following sizes:

- 1,00 m in white, chrome and gold
- 1,25 m in white, chrome and gold
- 1,75 m in chrome only

ALFIE Riser rail assembly

88900052 / 88900053

* All dimensions listed regarding the product and installation are approximate.
Please read the fitting instructions before proceeding.

Installation Instructions

TRITON ALWAYS RECOMMEND THE USE OF GENUINE TRITON ACCESSORIES FOR USE WITH A TRITON SHOWER. FAILURE TO USE GENUINE TRITON PARTS MAY INVALIDATE YOUR GUARANTEE.

INSTALLERS PLEASE NOTE THESE INSTRUCTIONS ARE TO BE LEFT WITH THE USER

Please refer to shower installation and operating instructions for service details

FITTING THE RISER RAIL ASSEMBLY

Fig.1

WARNING!
Check there are no hidden cables or pipes before drilling holes for wall plugs. Use great care when using power tools near water. The use of a residual current device (RCD) is recommended.

Decide the position for the rail on the wall within the shower area. Proceed as follows:

Offer one of the brackets to the wall. Position the bracket for the lower position and mark the centre hole. Remove the bracket then drill and plug the wall. (An appropriate drill bit should be used. If the wall is brick, plasterboard or a soft building block, appropriate wall plugs and screws should be fitted).

Fig.2

Slide the lower bracket onto the riser rail. Make sure to fit it the correct way round (fig.1). Align the opening in the bracket with the opening in the riser rail and temporarily secure to the wall (fig.2).

Slide the upper bracket onto the riser rail, again making sure to fit it the right way round. Align the holes at the top of riser rail and mark the centre hole. Remove the riser rail assembly from the wall then drill and plug the wall.

Fit the shower head holder onto the riser rail as follows: turn the handle of the holder counter-clockwise to release the locking mechanism, then slide the holder onto the rail (fig.3). Simply turn the handle clockwise to secure the holder in place.

Slide the hose retainer onto the riser rail and fit the lower bracket. Make sure to fit it the correct way round (fig.1) and secure to the wall. DO NOT tighten at this stage.

Secure the upper bracket in place. Now tighten both the upper and lower brackets.

Fit the end caps onto both brackets. The end caps will only fit one way.

Fig.3

FITTING THE RISER RAIL ASSEMBLY

FITTING THE HOSE AND SHOWER HEAD

Feed the flexible hose (fig.5) through the opening in the hose retainer (The hose retainer **MUST** be used to comply with Water Regulations).

Screw the flexible hose to the shower outlet and shower head, making sure the supplied washers are in place at both ends of the flexible hose (fig.6).

Place the shower head into the holder and check that it fits correctly (fig.7).

Note: The holder is slightly tapered and the shower head and hose will only fit from one direction.

IMPORTANT: It is the conical end of the hose which grips into the holder. The shower head will not fit in the holder without the hose attached.
